### DETAILED ACTION

1. Claims 16-19, 23-36 and 41 are presented for examination. Claims 1-15, 20-22 and 37-40 are canceled.
2. Claims 16-19, 23-36 and 41 are allowed.
3. The following is an examiner's statement of reasons for allowance: None of prior art of record explicitly teaches or fairly suggests all of the claimed limitation, especially the limitation of a controller configured to convert email attached data to image data, search for a predetermined image data fixed code in the image data part of the body of the received email when the received email is a multi-part structure, and to judge that the received email is an error mail when the predetermined image data fixed code is detected, where the predetermined image data fixed code is being set into the image data part of the body of the email by a image communication apparatus. The closest prior art of record, Toyoda fails to teach a predetermined image data fixed code in the image data part of the email of the body of the email nor to judge that the received email is an error mail when the predetermined image data fixed code is detected. Since Toyoda does not properly disclose the use of image data fixed code (e.g. SUkq format used in IFAX), Toyoda does not fairly suggest a proper motivation to combine with other references in searching for a predetermined image data fixed code, setting the image data fixed code into the body of email or judging error email using a predetermined image data fixed code. Additional reasons for allowance regarding previous allowed claims can be found in the office action mailed on June 24, 2005 by examiner Jenny Phan.
